

What Is Quantum Dowsing?

Quantum Dowsing is a unique energy clearing method created by Marie Diamond, a Transformational teacher, speaker and author. Marie created 3 systems to help people transform their lives by improving the energy in and around them: Diamond Feng Shui, Diamond Dowsing and the Inner Diamond. Each is a powerful way to help people transform themselves through either their environment (feng shui and dowsing) or through their own personal energy fields (inner diamond).

Quantum Dowsing is considered by many as an integral piece to begin your energy transformation. Through the technique of dowsing, you or a professional dowser, are able to find and clear negative vibrations in your home.

We are just beginning to understand the impact our environments have upon us. Energy or vibrations that we cannot see or hear do affect us both positively and negatively. We become aware of these vibrations when we start to feel their positive or negative affects upon us and our families.

Quantum Dowsing will allow you to find these energy centers—to enhance the positive and transform negative vortexes to positive ones. To see if you might have negative energy in your home refer to the interference lines list in this brochure.

Finding and addressing all of the above vibrations will transform your home. When you transform the energy of your home, you transform your life.

What We Dowse For

GEOPATHIC STRESS

Geopathic stress lines are created by scars in the earth and have an impact on the water in the body.

Water running beneath the surface creates disharmony in the earth. Various amounts of water will create different impacts. For instance, if there are drops of water creating scars, the effects will be less and felt over a long period of time. A large river of water will have an immediate impact and be immediately felt. Rivers up to two miles deep can have an influence. Fault lines and two soils that are combined in the earth, like clay and sand, will also create geopathic stress. The strongest geopathic stress, however, will come from the water.

If two geopathic stress lines cross, the energy created by these two lines will intensify the negativity and it will have a greater impact on anyone working or sleeping in this area.

Geopathic stress also affects trees and all living things so, when possible, we cure these stress lines to help the trees, shrubs and plants in our yard and gardens.

Symptoms of geopathic stress:

- Inability to receive deep, replenishing sleep
- Deplete immune system and an increase of illness
- Pain or disease in one particular area of the body
- Difficulty in keeping trees, shrubs or plants healthy
- Illness, stiffness and even death for some animals

ELECTROMAGNETIC FIELDS

Hartmann Lines: Every five steps on the earth, there is a line called a Hartmann Line. These lines always run from North to South and from East to West. This is the flow of the Magnetic Field of the earth.

With electricity, these lines become negative. The electrical power needs to be right on the Hartmann Line to change it to negative. If there is a power box on the Hartmann Line, the negativity becomes even stronger

The electromagnetics are in the aura field of the Hartmann Lines and spending any amount of time in these fields is like getting zapped with a current of electricity every 20 seconds. A negative Hartmann Line can be compared to microwave energy or a cold fire. The strength of the negativity of these lines depends on what's connected to it. A coffee machine will affect it less than a TV and a TV less than a power box.

CURRY LINES

Curry Lines are the same as Hartmann Lines except that Curry Lines run on a diagonal. They run from Northeast to Southwest and from Southeast to Northwest.

Effects of Negative Hartmann and Curry Lines:

- Nervous system disorders
- Inability to focus or concentrate
- Loss of memory
- ADHD like symptoms

INTERFERENCE LINES

Interference lines are frequencies created by cell phone towers, power lines, radio towers and satellite dishes. They are not as harmful to us outside (unless you stand right next to or under these places) but once these energies enter our homes, they become trapped inside and their negativity intensifies.

The negativity of this energy—usually referred to as Electro Magnetic Fields (EMFs)—depends on the proximity of the towers or satellite dishes.

An example of what these energies can do is a study that was conducted in Mill Valley, California back in the late 1990's. Because of all of the technological and computer companies located in that area, huge antennas were added on one of the hills directly above the city. Within the next five years, there was a 50% increase in the incidence of breast cancer in 40-50 year old women.

We don't all live in areas with that amount of EMF energy around us, but depending on your proximity to power stations, cell towers, etc., these energies will have an effect on you.

These interference lines can affect different aspects of our energy fields and these are some of the things they can interfere with:

- Clutter
- Joy
- Cooking
- Romance
- Passion
- Manifestation
- Self-Confidence
- Spirituality
- Openness
- Creativity
- Focus
- Inspiration
- Conflict
- Respiratory
- Self Esteem
- Success
- Relaxation
- Abundance
- Heart or Stomach
- Friendship
- Headaches

PERSONAL INTERFERENCE LINES

A personal line is the same as an interference line but it is a frequency that affects you personally and no one else in the home or office.

VORTEXES

There are both positive and negative vortexes around our planet and we will find some of these in our homes.

We can identify a positive vortex by the place (or places) where everyone loves to be in your home. If you have a natural positive vortex in your home, you are fortunate. These places create areas of natural, uplifting energy. When you spend time in this area, you will feel energized and inspired.

Famous positive vortexes around the world are places like Stonehenge and Avebury in England and Sedona in Arizona.

When your home is dowsed, the positive vortexes are identified and you can enhance these areas so that everyone in the home can benefit by them.

Negative vortexes are places where the etheric field of the earth has been disturbed and instead of creating a connection to higher realms of light, create an opening to the denser energies of the earth.

These places are easily identified, especially by people who sleep in this energy. Depending on how negative this area is, people will have bad dreams, nightmares, night terrors, and feelings of hopelessness and depression. A tendency towards addictions is also increased when these vortexes exist in homes.
